Background

The Electronic Miscellaneous Document has been designed within the Electronic Ticket Record to be as close to an Electronic Ticket as possible. Therefore it includes structures such as the Good for Passage Area (Record 05) (*where applicable*), Fare Calculation Area (Record 08) (*where applicable*), and Structured Fare Calculation details (Records 80-82).

Preamble

All relevant current fields existing in the ISR specification (for example, Date of Issue (DAIS), Form of Payment Type (FPTP), and Fare (FARE)) will be populated for the EMD where applicable. These are not specified below as mapping routines, and structures are already in place to handle existing data elements. The below specification focuses on the new elements and records required for the EMD and is based on the following assumptions:

- (1) The existing ISR format is the basis for reporting the transaction
- (2) New elements are populated based on these three areas:
 - a. Pricing transaction
 - b. BSP/ARC data elements passed in specification
 - c. EMD ticketing resolution

The records below will need to be handled in the ISR load process, as well as the BSP/ARC ISR creation process, and carried through to the output file.

Specifications

The EMD will be presented structurally as follows in the ISR output. Note that **bold** records shall always be present for every reported EMD.

Primary

Record 1	Base Sale Record
Record 2	Marketing Record (Optional)
Record 3	Additional Sale Data
Record 4	Financial Record (Repeatable)
Record 5	Itinerary Record
Record 7	Form of Payment Record
Record 8	Fare Calculation Record
Record 9	Exchange Document Information (Optional)
Record 15	EMD Coupon Detail
Record 16	EMD Pricing and Baggage Record
Record 17	EMD Service Description
Record 18	EMD Remarks
Record 24	Exchange Detail Record (Optional)
Record 25	Discount by Coupon (Optional)

Record 32	Transaction Header Record (Optional)
Record 80	Fare Break Information Record (Optional)
Record 81	Coupon Related Information Record (Optional)
Record 82	Priceable Unit/Ticket Related Information Record (Optional)
Record 83	Coupon Tax, Fee, Charge Information Record (Optional)

Conjunction (up to three)

Record 1	Base Sale Record
Record 2	Marketing Record (Optional)
Record 5	Itinerary Record
Record 15	EMD Coupon Detail
Record 16	EMD Remarks and Baggage Record
Record 17	EMD Service Description
Record 18	EMD Remarks
Record 24	Exchange Detail Record (Optional)
Record 25	Discount by Coupon (Optional)
Record 81	Coupon Related Information Record (Optional)
Record 83	Coupon Tax, Fee, Charge Information Record (Optional)

There will be transactions where records contain very little data; however, ATPCO has decided such records will still be reported in order to maintain the structural integrity of the transaction. The three main records to which this applies are as follows:

- (1) Record 05 itinerary in which an EMD standalone may not have any Good for Passage data (for example, cancellation penalty EMD). As such, every coupon shall be reported with at least a coupon number and the carrier performing the service (operating carrier) in the MCAR field.

- (2) Record 08 Fare Calculation, where single service coupons or standalone coupons may be reported with a coupon value (Record 15). As such Record 08 will be reported with the Fare Calculation Pricing Indicator for the EMD and the FCRS set to 1, 2, 3, and 4 respectively
- (3) Record 17, where no elements exist. The Record will be reported with the coupon numbers populated in their respective positions.

Specifications for Records 15, 16, 17, and 18

Four new records are proposed to accommodate the various elements in the EMD. The focus has been to bring in both data driven and text elements to support the sales reporting of the document. Only one text element, the “Reason for Issuance Description,” at the EMD level, has not been included because this is a clear lookup from the code (Reason for Issuance Code), which is included in the text. This exclusion was to avoid adding more text to the record.

In order to accommodate all of these elements within three new records, the following text has been truncated to fit the data element into the existing structure:

- Reason for Issuance Sub Code Description (Commercial Description) from 44 to 70
- Coupon Remarks from 65 to 70

Truncation could be avoided by adding further records, but until EMDs start being issued in the marketplace, the actual usage of these text data elements is not known (i.e. whether repeatable or not at the coupon level).

The following records have been added:

- (1) Record 15 – EMD Coupon Detail
- (2) Record 16 – EMD Service and Baggage Record
- (3) Record 17 – EMD Service Description
- (4) Record 18 – EMD Remarks

The following data elements have been added:

EMCP	EMD Coupon Number
EMOC	EMD Fee Owner
EMIC	EMD Reason for Issuance Code
EMSC	Reason for Issuance Sub Code
EMFT	EMD Flight Ticket Merchandise Tag
EMAG	EMD Attribute Group

15	O	N	220123456 7890	N	77 149 221 293

The ticket number of the Electronic Ticket to which the EMD has been connected. The Standard Traffic Document numbering system is described in Recommended Practice 1720a and currently comprises the following:

- Airline Code: three-digit airline code number;
- Form Code: A maximum of three digits indicating the type of document, the source of issue, and the number of coupons it comprises;
- Serial Number: A maximum of eight digits allocated on a sequential basis, provided that the total number of digits allocated to the Form Code and Serial Number shall not exceed 10.

This data element can be used in two ways:

- (1) to indicate an "in connection with" relationship (for example, when a residual balance EMD is issued)
- (2) to indicate an association at coupon level, in which case the EMD Related Coupon Number also will be populated

<i>Glossary Reference</i>	<i>Element Description</i>				<i>Attribute</i>
EMRC	EMD Related Coupon Number				1 Alphanumeric
<i>Record</i>	<i>Status</i>	<i>Facsimile</i>	<i>Example</i>	<i>Cross-Edit</i>	<i>Starting Position</i>
