

Baggage Calculator

*Gain 24/7 access to critical
baggage information*

*Retrieve real-time baggage data quickly,
accurately, and easily with
ATPCO's new Baggage Calculator solutions*

With ATPCO's Baggage Calculator, you can ensure your bag fees are always collected correctly—even on complicated interline and alliance journeys. Using the Baggage Calculator products, reservations and check-in agents can find the applicable baggage fees for any passenger quickly and easily, helping you avoid potential revenue losses and costly debit memos.

The Baggage Calculator is available through two unique connectivity methods—a dynamic XML-based Web Service that can be seamlessly connected with your pricing, reservations, and departure control systems, as well as a standalone Web-based application. No matter which method you select, the Baggage Calculator enables you to get real-time baggage information from our IATA-designated industry source whenever you need it. Simply enter a few key passenger and itinerary details and you'll receive a complete list of what bags are allowed for a particular journey, as well as which items cost extra and how much.

For more information, visit our Web site at www.atpco.net. Want to see the Baggage Calculator in action? E-mail ATPCO at baggagecalculator@atpco.net to request a live demonstration.

Protect your revenues

- Ensure your baggage fees are always collected correctly on interline journeys
- Avoid costly debit memos and potential revenue losses by making sure your agents always assess the right fees for your interline and alliance partners
- Improve baggage ticket audits for correct pricing and interline settlement by providing your revenue accounting staff with access to valid and real-time baggage information for all your partners
- Review baggage trends and policies to make sure you set and maintain a competitive baggage policy

Comply with regulations

- Meets the requirements of IATA Resolution 302 by establishing your baggage rates and making that information available to passengers at all touch points
- Adheres to US Department of Transportation regulations, which further regulate baggage policies for travel to and from the United States

Features

- Two unique connectivity methods
 - XML application programming interface (API) for machine-to-machine connections
 - Web-based application accessible from any Internet-connected computer
- Real-time electronic transmission of most significant carrier, free baggage allowance, excess baggage charges, and approved baggage services
- Data supplied by ATPCO's Baggage Allowance and Charges, the industry's single source for interline baggage policies
