

ATPCO

You asked, we listened:

The best Carrier-Imposed Fees application yet!

Webinar
March 21, 2017

Intuitive design

Custom view

Set your preferences and customize your view

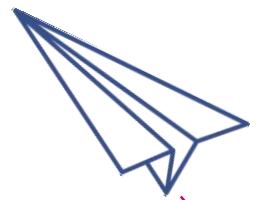

Single screen

Complete all your tasks on a single screen

Fewer steps

Create, save, and release your data faster

Improved workflow efficiency through customized view and fewer key strokes required to manipulate, save, and release data

Create, save, release data **in fewer steps!**

Today's Process

New Process

Batch management *you always wanted*

The screenshot displays the ATPCO batch management interface. At the top, there are search filters for 'RBD' (Search for Up to 3 RBD) and 'Batch' (Batch ID and Batch Number). Below these are 'Search' and 'Reorder' buttons. The main area shows an 'Active Batch:' dropdown menu with a list of batch options. A yellow arrow points to the dropdown, and another points to the 'Save' button. Below the dropdown is a table with columns for 'Return to Journey Origin', 'Amount', 'CUR', 'First Ticket', and 'POT LOC'. The table contains several rows of data, including amounts like 25.00, 20.00, and 21.00, and currencies like AUD, USD, and KR.

Return to Journey Origin	Amount	CUR	First Ticket	POT LOC
<input type="checkbox"/>	25.00	AUD		
<input type="checkbox"/>	20.00	USD	23OCT15	KR
<input type="checkbox"/>	20.00	USD	23OCT15	KR
<input type="checkbox"/>	20.00	USD	23OCT15	KR
<input type="checkbox"/>	20.00	USD	23OCT15	KR
<input type="checkbox"/>	21.00	USD	23OCT15	KR

Simply save your changes and the system will create a new batch automatically

Or

Add data to an existing batch from the Active Batch list

Reorder? **Easy!**

You will be able to reorder your sequence by selecting the Reorder View and dragging and dropping the sequence where you want it to be. It's a quick and easy way to manage the hierarchy of the sequences. Once you select a row and drop it to the new location, the system will automatically assign a new sequence number for that row.

Description field

Label your data

Give your data a meaningful description

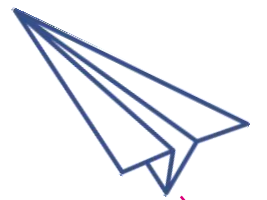

Searchable field

Locate your data easily

Viewable within your organization only

Not included in subscriptions

Label your pricing initiatives directly in the Carrier-Imposed Fees application to ensure the right sequences can be easily located and identified

Give your data a meaningful description

Filtering for precision

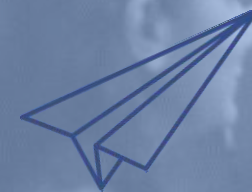

When you supply a filtering parameter and click “Enter”, the system displays every record containing that value

You can refine your results by choosing any of the 13 available logical indicators such as “equal”, “does not contain”, etc.

How about a knowledge test?

1. What will you use the new **Description field** for?

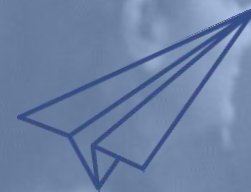

- A. Give your data a meaningful description for easier location and future reference
- B. Describe how the fee is to be shown on the ticket
- C. Share with ATPCO your experience with the new user interface

How about a knowledge test?

2. Which **search and/or filtering** criteria should you use to view Carrier-Imposed Fees data for sectors coded as WAS in LOC1?

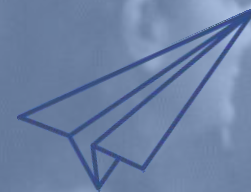

- A. Enter WAS in a Sector Location 1 search field
- B. Enter WAS in a Sector Location 1 filtering field
- C. Enter WAS in a Journey Location 1 search field and in a Sector Location 1 filtering field

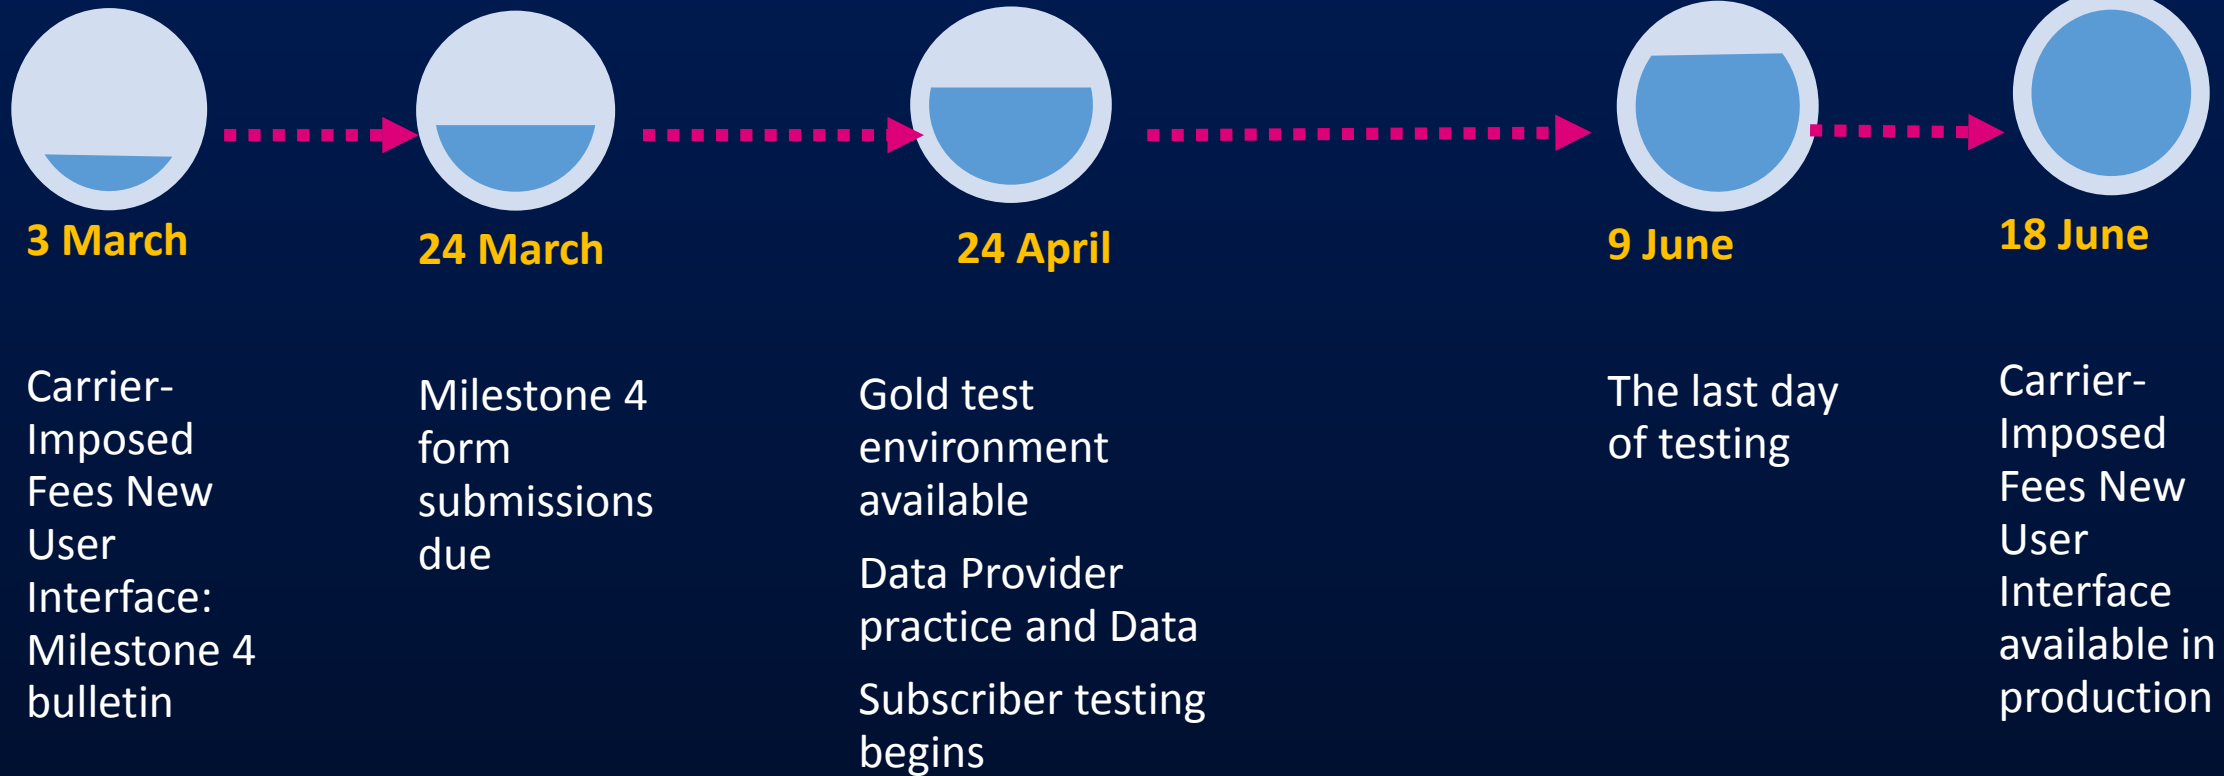

How about a knowledge test?

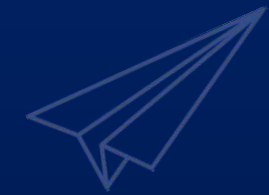

3. Which of the following best describes the Carrier-Imposed Fees **new user experience** ?

- A. New application design will allow users to complete all tasks on one single screen
- B. New user interface will have three color themes to choose from: green, blue, and pink
- C. Multiple users can work on the same carrier's data at the same time

Implementation **timeline**

3 things to know about the test environment

- The Carrier-Imposed Fees application available in a test environment is a beta version of the production system being implemented on 18 June
- All customers who currently have access to Carrier-Imposed Fees will have access to the test version and will benefit greatly from experiencing and learning the enhanced application
- Data in the test environment will replicate your production data as of 15 April. The changes you'll make to your data in test environment will not affect your actual production data.

Production Release

18 June 2017

Educational **resources**

Webinars

Product documentation

How-to Videos

Feel free to contact Natasha Safronova nsafronova@atpco.net to discuss your educational needs

Subscriber testing

- Carrier-Imposed Fees subscribers must be prepared to receive the following new fields, effective 18 June 2017
- The length of the subscription Record S1 will not change

Field	Location	Specification
RBD Table 198	182-189	00000000
Cabin	190	Blank
Resulting Fare Class Table 171	227-234	00000000
Ticket Designator table 173	235-242	00000000

A quick look into the new data elements

Coming in the 2018 release

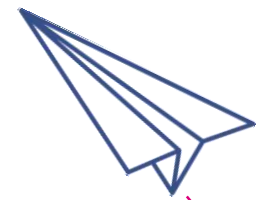

RBD Table

**Fare Class
Table**

**Ticket
Designator
Table**

Cabin

- **Control carrier-imposed fees by the cabin of travel**
- **Improve workflow efficiency in terms of speed-to-market and error minimization through sequence consolidation**

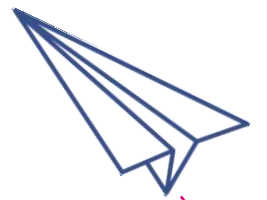

When will **the new fields** become available?

Airlines:

- Communicate your priorities to your airline GDS account manager (person responsible for GDS communications)
- Ensure your airline communicates your priorities to the airline account manager in GDS

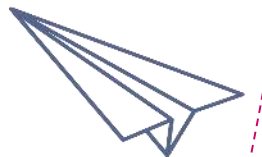

Your input is **valuable!**

**Communicate your
priorities to your system**
