Carrier-Imposed Fees Engine **Prototype**

The Carrier-Imposed Fees Engine calculates fuel and carrier-imposed fees for selected itineraries.

- Generate possible itineraries for a market
- Determine matching carrier-imposed fees record sequences for selected itineraries
- Calculate fuel and carrier-imposed miscellaneous fees per itinerary
- Help verify coding of carrier-imposed fees
- Web service API

POTENTIAL VALUE OF USING CARRIER-IMPOSED FEES ENGINE

- Validate coding and detect errors for airline pricing analysts
- Sandbox feature allows pricing analysts to model "What if" scenarios before entering Carrier-Imposed Fees data
