

NEXT GENERATION STOREFRONT™ WORKING GROUP

AGENDA

19–20 June 2019

Wednesday 19 June 2019 – Optional Primer Session

What is NGS?

- Detailed session covering the concept and underlying ideas, designed for participants who are new to NGS and want to learn more about the standard and goals

Retailing Content

- Detailed session working through the source data of rich content including Routehappy Amenities, Universal Ticket Attributes (UTAs), and Universal Product Attributes (UPAs) content

Fare Content

- Detailed session covering branded fares, optional services, change policies, baggage, and more

Thursday 20 June 2019 – Full Day Session

Introductions and Code of Conduct

Data Definition and Processing – Defining standards for data and processing

- Data Application: Review of data definition and application of data used in NGS
- From source to NGS: Review how data is sourced and transformed for use in NGS
- Review of transatlantic shelf algorithm
- API Presentation/Demo: ATPCO will demonstrate NGS API v.06 with transatlantic algorithm
- Introducing UPAs to NGS Standards: Include UPA in shelf display

Content Acquisition – Identification of data gaps and analysis of results

- Gap analysis statistics

Proposals – Review proposed solutions to solve NGS challenges

- Multi-leg itineraries: A review of using the leg with the longest TPM in a multi-leg itinerary to determine shelf placement and which algorithm to apply
- API Presentation/Demo: ATPCO will demonstrate NGS API v.06 with multi-leg itineraries
- À la carte bundles
- Filter by attribute: An alternative to good, better, best attribute grouping
- Alternative shelf grouping: New concepts for shelf grouping will be reviewed

Proofs of Concept (POCs) – Review trials and status

- API Version Scorecard
- Charter and status

Action Items and Next Steps

- Codeshares: Food for thought for NGS next steps
- Review of meeting outcome, action items, and what's next
